WORLDWIDE DIRECTORY OF
SYSTEMS ENGINEERING &
INDUSTRIAL ENGINEERING
ACADEMIC
PROGRAMS

January 29, 2017

Dear Colleagues,

It is our pleasure to release our third edition of the Worldwide Directory of Systems Engineering and Industrial Engineering Academic Programs. The Directory is a collaboration of the International Council on Systems Engineering (INCOSE) and the Systems Engineering Research Center (SERC) at Stevens Institute of Technology. This distribution and your continued contributions are evidence of our strengthening academic network. We continually receive updates, which illustrates the need for us to continually update and improve the Directory.

We very much appreciate your continued support and hope you find this Directory of value. Please continue to share it with your colleagues. Any updates or corrections are welcomed at: ***ISEDirectory@stevens.edu***.

Sincerely,

INTERNATIONAL COUNCIL ON
SYSTEMS ENGINEERING (INCOSE)

SYSTEMS ENGINEERING
RESEARCH CENTER (SERC)

INTRODUCTION

The information herein was primarily drawn from university websites, with verification or updates from faculty included as much as possible. For each university with systems and industrial engineering offerings the following information is provided: the name and address of the university; the specific degrees the university offers (e.g., a B.S. in Systems Engineering or a Ph.D. in Industrial Engineering); the academic unit that offers these degrees; the head of the academic unit offering these degrees; and a URL where more information can be found.

This is the third edition of the Directory, reflecting numerous updates since the first edition was released in early 2015. We plan to publish a new edition annually and welcome your help in improving the content. With each new edition, we want to correct any errors identified by the community, incorporate new programs, and add any programs we may have inadvertently omitted. The release schedule will be adjusted for better alignment with the Academic calendar year, with a Fall 2018 release as the 2018-2019 edition. In addition to a limited number of printed copies, the directory is posted online at both the INCOSE (www.INCOSE.org) and the SERC (<http://www.sercuarc.org/world-wide-directory/>) websites to enable broad distribution.

There were challenges in deciding which programs to include, as there are many variations in how universities name their systems and industrial engineering programs, especially when looking globally. We have tried to keep things simple. With a few exceptions, we included only programs with the title “Systems Engineering,” “Industrial Engineering,” or programs that combine other fields with these, such as “Operations Research and Systems Engineering.” Generally, we did not include programs targeted to a specific domain or technology, such as “Computer Systems Engineering” or programs which involved more business-focused courses such as “Engineering Management.”

If you would like to suggest improvements to the directory or if you would like additional information, please contact: *ISEDirectory@stevens.edu*

ACKNOWLEDGEMENTS

In addition to the various people who answered our call for updates, we wish to acknowledge the efforts of the following individuals as principal contributors to the third edition of the Directory: Myriam Marcus, Nicole Hutchison, Kristine Gallo, Renuka Dakshinamurthy, and Namankita Rana. Additional thanks to Megan Clifford, and Dinesh Verma for their efforts and support of this project.

We also wish to acknowledge the efforts of the following individuals as contributors to the compilation of the previous editions of the Directory. Second Edition: Megan Clifford, Alekhya Andar, Kristine Gallo, Myriam Marcus, Christopher Klesges, LaShawn Adams, and Art Pyster. First Edition: Doris Schultz, Govarthan Ravichandiran, Harsh Shah, Myriam Marcus, Kristine Gallo, Pranav Patil, Art Pyster, and Megan Clifford.
