Biography

Sven-Olaf Schulze (CSEP and Certified Systems Engineer Level A) is a Principal at UNITY whose work focuses on Systems Engineering, program-, project- and agile management, primarily in the area of product development and innovation. He studied at the Technical University of Braunschweig and worked in these areas of concentration in the aerospace and wind power industries for 16 years until 2012. Sven-Olaf is an active member in the German Chapter of INCOSE (GfSE) since 2003 and the president from 2009 until 2019. Currently in the extended board responsible for certification and education. He is the current EMEA Sector Director for sector II since 2021 in the INCOSE Board. For more details visit the LinkedIn profile at https://www.linkedin.com/in/sven-olaf-schulze-9aa07514/

Vision

Vision: Sven-Olaf Schulze as Sector Director until IW2026

- Further enabling the digitization from local to global
  - SE content work
    - Continue with the established knowledge: „We as sector II know how SE works"
    - Share within INCOSE working group results and foster the international working groups from EMEA
  - Mature the commercial part of our chapters - Phase 1 / Preparation
    - Further digitization of commercial services – to prepare chapters for the future
    - Check and validate the local need from each chapter
    - Provide and develop local valuable solutions and harmonize a common EMEA view for INCOSE central
    - Make use of existing experience from Chapter Leader and provide Innovation / Digitization to others
- Interface to INCOSE
  - Building the bridge between chapters (members) to INCOSE central
  - Make services and IT infrastructure for EMEA chapters available
  - Ensure information flow

Mature existing chapters from commercial point of view, too & integrate emerging chapters
